Product Overview

InfoSoft Restaurant Billing System is a simple, user-friendly application built to automate the day-to-day operations of restaurants and cafés. It brings together point-of-sale, order management, kitchen coordination, delivery tracking, and sales analytics into one connected platform — helping every member of staff, from the counter to the kitchen to management, work from the same real-time picture of the business.

Equipped with intuitive touch-screen POS features, simple configuration, and detailed sales analysis reports, InfoSoft is designed to reduce manual work, minimize billing errors, and give owners clear visibility into performance across single or multiple outlets.

InfoSoft Café POS — in-store solution overview

Core Application Features

<p>Touch Screen Interface</p> <p>Fast, intuitive touch-based navigation designed for high-speed order entry at the counter.</p>	<p>Invoice Printing</p> <p>Generate and print clean, professional customer invoices in seconds.</p>
<p>Kitchen Order Tickets</p> <p>Orders route directly to the kitchen display or printer for immediate preparation.</p>	<p>Barcode Support</p> <p>Scan barcodes for fast, accurate item entry and inventory-linked billing.</p>
<p>Cash Drawer Integration</p> <p>Automatic cash drawer control tied to each completed transaction.</p>	<p>Sales Analysis Reports</p> <p>Built-in reporting for tracking revenue, item performance, and trends over time.</p>

InfoSoft Café POS — Key Features

Building on the core billing platform, InfoSoft Café POS adds a full suite of coordination and management tools that connect the counter, kitchen, delivery, and back office in real time:

- Counter Management — streamlined order intake and billing at the point of sale
- Order Processing, Billing & Cash Confirmation — end-to-end handling of every transaction
- Efficient Delivery Tracking — monitor delivery orders from dispatch to completion
- Real-Time Updates — order and payment status synced live across all devices
- Enhanced Coordination & Comprehensive Reports — seamless handoff between teams, backed by detailed reporting
- Management Insights — actionable visibility into sales and operational performance
- User Authorizations — role-based access control for every level of staff
- Mobile Features — key workflows available on mobile devices for staff on the move

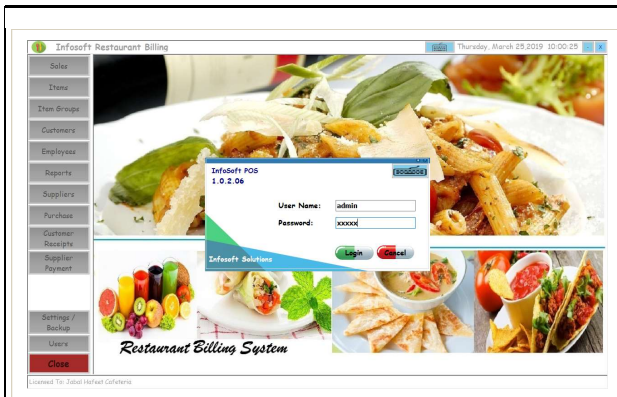

Role-Based Mobile Access

InfoSoft Café POS extends core functionality to mobile devices, giving every role exactly the tools they need — nothing more, nothing less:

Kitchen Staff	View serving orders and confirm orders concurrently as they are prepared.
Counter Staff	View order status, manage billing, and confirm cash transactions.
Delivery Staff	Track delivery status and manage pending cash confirmations on the go.
Sales Managers	Access real-time order status, monitor sales performance, and oversee delivery operations.
Admin Users	Track all transactions and monitor order change logs across the system.

Application Screens

Why Choose InfoSoft Cafe

Simple & User-Friendly

A clean touch-screen interface means minimal training time and fast adoption by staff at every level.

Connected Operations

Kitchen, counter, delivery, and management all work from the same real-time data — reducing miscommunication and order errors.

Insight-Driven Management

Comprehensive sales analysis reports and transaction logs give owners and managers the visibility needed to make informed decisions.

Secure & Accountable

Role-based user authorizations and full order-change tracking keep operations secure and auditable.
